TÜV Rheinland confirms that Bischoff & Ditze Energy GmbH comply with the following conditions for the product *European Green* (acc. Catalogue of Criteria 1.1“):

- Within the framework of *European Green* approved, certified guarantees of origin (GoO) for the generation of electricity from renewable energies are used.
- The following renewable energy sources allowed
 - hydro power
 - wind power
 - biomass
 - geothermal energy
 - solar power
- Any GoO-package sold under the European Green label has to originate from at least four distinct countries.
- GoO-packages sold under the European Green label have to come from at least four distinct renewable energy sources:
 - the share of any energy source included has to be at least 5% and can be at most 65%
 - the combined share of biomass, geothermal and solar energy has to be at least 15%.
- The production plants and their owners are clearly identifiable.

Within the framework of an initial audit TÜV Rheinland verified whether the prerequisites for compliance of the conditions set out in the catalogue of criteria were fulfilled. In future the compliance will be verified by an annual audit.

Bischoff & Ditze Energy GmbH has approved and contractually guaranteed the criteria and the test procedure for *European Green* acc. catalogue of criteria 1.1.

The validity of the certificate can be verified based on the ID 00049103 under www.tuv.com.
